

## Exercise - Delete an Entity

You can delete Entities using the Entities panel.

Please note: You can't delete an Entity if any component IDs use that Entity.

1. Your task is to delete the 'phone' Entity, but you'll need to delete or re-assign any related components.
2. For this exercise, delete the 'Home Phone' component on the form
3. Notice: the 'phone' Entity no longer has any related component IDs

4. Right-click the 'phone' Entity and choose 'Delete Entity'
5. Click 'OK' to confirm
6. The Entity has now been deleted from the Entities panel
7. Click Save
