

## Exercise - Upgrade a project

You can upgrade an existing project to the latest Maestro release from the Management Dashboard.

### Step 1: Import a project

To upgrade a project, you'll need to add a legacy project to your organization first.

1. [Download](#) this sample project (zipped folder)
2. Remember where the project is stored, e.g. 'Downloads'
3. Navigate to the Maestro webpage
4. [Expand](#) Home (in Navigator Panel)
5. [Select](#) the Organization (the Organisation maybe your own name e.g. jsmith)
6. Click 'Import Legacy Project'
7. Name the project - 'Legacy Project'
8. Click Import
9. Navigate to the location of the sample project
10. Select the project and click Open
11. The imported project should now appear under your organization

### Step 2: Upgrade the project

1. Select 'Legacy Project' project in the Navigator
2. Click the Project Details tab
3. Display the 'Release Version' dropdown and choose '17.10.0'
4. **Note:** When you select a new version, a warning message confirms you can't change the release version back to a previous version once the Project Details are saved

5. Click OK in the warning message
6. Click Save
7. The project has now been upgraded

**Notice:** The Release Version dropdown no longer displays any previous release versions
